Evening Gowns—Jet Used Extensively—Accordion Plaited Skirt Popular—Waists for Tailored Suits—Basques Again in Vogue—One Piece Dress One of Fashion's Decrees—Recipes—Planking Fish—Onion Soup a la Clermont—Cucumber Spirals—Grapefruit Salad.

## EVENING GOWNS.

Jet is used extensively on the evening gowns. Not one kind of beads, but nearly all kinds are beaded on tulle. Tulle dresses with butterfly sashes in round dancing lengths are especially sought after by the younger contingent. Words seem inadequate to describe the lovely materials. First and foremost are the elaborate lace gowns which are made over Pompadour silk. The corsages are very delectable and nearly sleeveless. A fetching gown, which brought forth exclamations of admiration, had a skirt of pink metallic brocade, with a bodice of filmy lace studded in beads over flesh colored tulle. The new poise of the figure which some call the eighteenth century droop, was emphasized by the fullness of the skirt in front and the wide girde. Strands of beads harmonizing with the gown are draped over the shoulder and caught up in front with a beaded ornament.

Another dress of pink crepe has the waist trimmed with beaded bands which came from under the arms and ended on the side front. Strands of beads extended over the shoulder and trimmed the sleeves and low V neck. The bottom of the skirt was edged with a beaded band as also was the train. The trains on evening skirts are narrow and draped in such a way that they can be caught up in front to stimulate a drapery when not in use.

Accordion plaited dresses are a delight for those who indulge in the new style of dancing, and as dancing is the chief amusement at present, we predict that accordion plaited dresses will be seen more than any other style for evening wear. Could anything be lovelier than a dress of accordion plaited green chiffon? Over the chiffon were two flounces of white maline lace partly veiled with black maline lace, the second flounce being about seven inches shorter than the lower one. The same idea was carried out in the low draped lace bodice.

## WAISTS.

Waists to wear with tailored suits are of crepe de chine, plaid silk, soft silk, plain or fancy silk jersey, and lingerie waists. A new material used in lingerie waists is book muslin, an old fashioned material which we call by a French name, the back and sleeves of soft silk models are cut in one. Many of the waists are made with a basque. Bolero blouse with a peplum in the back are a good choice. The strictly tailor made waist of tub silk and crepe has proved its value too much to be discarded. Long sleeves finished with frilly ruffles seem to be the thing. The better grade waists are usually fitted with Bayadere sashes, the yokes are adjustable and are sometimes buttoned to the waist with small novelty buttons. Dressy waists are of net, chiffon, filmy laces and beaded net. Unless the waist is white it usually harmonizes with the suit. Printed silks, modern designs, are used in waists. Waists are made with simulated vest effects. Some exclusive

models have the waist in vestlike form with the sleeves in another color, usually in printed material. Fichu effects for the waist (front filled in with hemstitched ruffles, are well liked. Fashion continues to set its approval on the all in one dress season after season. Simple one-piece dresses are made so that they conform to all the style requirements. Wool, poplin, wool crepes, serges, Jacquard effects, wool, brocades, eponge and soft crepes and silks are the most suitable.

A costume of tan and brown plaid had chamois collars and cuffs, the belt was in one with the peplum which only was at one side in the back. The bishop sleeves were set in kimono fashion. The skirt was slightly draped in front with an inset of chamois which reached to the knees.

Another dress of blue serge had a wide sash of black silk lined in grey striped silk. This was swathed around the hips and tied in front. The waist opened over a vest of the silk and was very blousy in effect.

## Onion Soup a la Clermont.

Potage a la Clermont, as it is called, is held in high esteem. To make it, cut a dozen small onions in rings and fry to a golden brown in a little butter or olive oil. Remove, drain on a fine sieve, then put into two quarts of clear broth, veal or mutton, colored with a little culinary bouquet to an amber color. Season with salt and pepper and serve with toasted sippets of bread soaked in the tureen.

## PLANKED FISH.

In planking—and there is no better way of developing the distinctive flavor of any of the delicate white-meat fish—the plank itself is of first importance. It must be of hard wood—hickory, cherry, live oak, cedar or ash, well seasoned and sawed about an inch and a half thick, rounded or tapered at one end like an ironing-board. This is to accommodate the tail of the fish. It is best to get one tongue and grooved at the ends, with wire attachments to hold the fish in place. These can be purchased now at any of the hardware or department stores, and so reasonably that even the housekeeper of small means can afford to keep a plank specially for the cooking of fish. After a plank has been well charred and seasoned, it becomes a treasure well worth having. After the first scrubbing and charring, the plank should never be washed. When used afterward, scrape clean carefully, then wipe with a clean dry cloth.

Good olive oil or vegetable oil is the best substance to use in greasing a plank, though butter or sweet dripping will answer. Heat the plank in the oven or before the fire. Have the fish split down the back, removing the back bone; clean, wash and wipe dry, then season with salt and fasten to the hot board with the fixture that comes for that purpose. Brush with pure vegetable oil or melted butter and season with salt and

pepper. The skin side goes next to the board. If you use a gas stove for planking your fish, as most of us do, turn on both burners under the oven and lay the plank in the bottom of the broiling oven for at least twenty minutes. Then lift on to the bottom of the oven and allow it to brown delicately, basting frequently with butter and lemon juice. When the fish is done, put plank and all on a jappaned tray or very large platter and serve.

## Cucumber Spirals.

Peel the cucumbers, toss into ice-water, then cut round and round with a fine sharp knife as if peeling an apple. The result should be a long slender spiral that makes ring after ring. Serve with French dressing.

## Grapefruit Salad on Artichoke Hearts.

For this use either the fresh artichokes boiled in salted water or else the canned artichoke bottoms that have been cooked about ten minutes in chicken stock. This stock may be made from the carcass of a chicken boiled up in a little water and well seasoned, or one of the capsules that come now for chicken broth. Drain the artichoke, cool, marinate with French dressing and let stand an hour. Then arrange on crisp lettuce leaves, arranged cup fashion. Mound with grapefruit that has been chilled and marinated also, and pour over all a French dressing. Garnish with strips of red pepper, or stuffed olives. For the French dressing use red wine, vinegar, oil and paprika.

## How to Keep Face Young and Attractive

(National Hygienic Review.)

The way to ward off old age is not to fear it, not to allow one's self to be oppressed by the dread of advancing years. Use only legitimate preventives and avoid trying experiments with preparations not indorsed by physicians. An entirely safe and very effective way to keep the complexion young-looking and beautiful is to apply ordinary mercurial ointment at bedtime, using it like cold cream, washing it off in the morning. This gradually absorbs the withered, faded cuticle, which is replaced by the more youthful, pink-tinted underskin. One ounce of this wax, to be had at any drug store, is enough to completely rejuvenate a worn-out complexion.

Crow's feet and other wrinkles, the first signs of advancing age, may be removed by a simple, harmless preparation made by dissolving an ounce of powdered salolite in a half pint witch hazel. It is used as a face bath.—(Advertisement.)

## BOY DIES FROM THE EFFECTS OF A FALL

Clifford Wilson, the 10-year-old boy who fell from a fruit wagon on Sunday and sustained a fractured skull, died at 9:30 o'clock last night in the Doe hospital of concussion of the brain. The boy was the son of Mr. and Mrs. Joshua Wilson, 233 Healy avenue.

When the boy sustained the gashed skull Sunday afternoon, he was rushed to the Doe hospital for treatment. The wound was declared serious, but was not considered fatal. He weakened rapidly, however, yesterday.

The body was removed to the Larkin parlors to be prepared for burial. Besides his parents, the boy is survived by three brothers, Victor, Leonard and Roy. Bishop John Rackham is the grandfather.

## TEACHERS ARE TO HEAR SPEAKERS

A meeting of teachers of Summit, Boxelder, Morgan, Davis and Weber counties will be held in Ogden in October for the purpose of sharing ideas and listening to a good speaker to be brought to Ogden from the east. The announcement of the meeting was made by Supt. J. M. Mills during the meeting of teachers and supervisors in the High School yesterday afternoon.

Prof. H. R. Briggs of the University of Utah will deliver a lecture on "Wrangling" to the Weber county teachers when they meet for the institute on Friday and Saturday. Dr. A. A. Robinson, county physician, will address the teachers on "Diseases of Children."

Supt. W. N. Peterson of the county schools will preside over the meetings.

## YOUTHS ARRESTED FOR ATTACKING GIRL

Salt Lake, Sept. 16.—Alleged to have taken a girl 15 years of age to a lonely spot in a grove just north of Warm Springs and there attacked her, M. Hagwood, 21 years of age, and A. C. Harrison, 20, were arrested last night by Patrolman A. C. Hargrove and Chauffeur George Moore.

The cries and pleadings of the girl were heard by F. and William Luker, two brothers of Wood's Cross, who were unloading a car of powder on a siding near the place of the attack. They started to interfere, according to their story to the police, and were told by the youths to keep away. Fearing that the boys were armed, the Lukers retreated and telephoned for the police.

The patrol, carrying Dr. H. B. Sprague, in addition to the officers, was driven to the isolated spot at top speed. The girl was found almost fainting with exhaustion. She was taken to police headquarters in the physician's care while the youths were attended to by the policemen.

State of Utah, City of Ogden, Lucas County, ss. Frank J. Cheney, clerk of said county, do hereby certify that the within and foregoing is a true and correct copy of the original as the same appears in the files of said county.

Given to be before me and subscribed to by me, this 16th day of September, A. D. 1913, at Ogden, Utah.

# TREE TEA

The mother of the girl was notified and called for her daughter shortly after the auto patrol had reached the station. The police say that the case looks serious for the prisoners.

## TEACHERS ASSIGNED

Tooele, Sept. 16.—The Tooele district schools opened yesterday with the largest enrollment yet attained here. This was to be expected when the recent enrollment showed 957 children in the district between the ages of 6 and 18 years—nearly 100 more than any previous year's census.

The following list of teachers gives the assignments for the present year: Alfred M. Nelson, district supervisor; Stanley Johnson, music; Marie Clark, art; Della L. Green, eighth grade; C. H. Barton, seventh grade; Blaine Watson, sixth grade; Ruby Naigle, fifth grade; Gene Cannon and St. Iome McKean, fourth grade; Francis Shields, third grade; Dora Hunter and Naomi McKean, second grade; Agnes Stewart and Bee Beckstead, first grade.

On the east side Percival J. Rock is principal, assisted by Edith McKean. Besides these, O. A. Bates, Georgia Creighton and Miss Larson will hold sway in the Lincoln district.

The rooms are crowded and soon a new grade school building will be necessary to accommodate the fast-increasing population.

## ACCIDENTALLY KILLED.

Ely, Minn., Sept. 15.—Accidentally shot while hunting, Theodore Skalk, 10 years old, was carried nearly two miles by Dewey Knutson, aged 17, to a hospital here, where he died yesterday. Makala's gun caught on a bush and as he turned to dislodge it it was discharged the bullet passing through his body.

## HENEY IS CANDIDATE FOR SEAT IN SENATE

Los Angeles, Sept. 15.—Francis J. Heney, the famous graft prosecutor of San Francisco, today definitely announced himself a candidate for the United States senate to succeed Geo. E. Perkins of Oakland, whose term of office expires March 4, 1915.

Mr. Heney is in Los Angeles arranging details for the carrying on of the oil pipe line case before the interstate commerce commission.

"My hat is in the ring," he said, when asked about his candidacy. "I think that is sufficiently definite."

The only other candidate for the United States senate is James D. Phelan, the well known Democratic leader of San Francisco.

## PROVO NEWS.

Provo, Sept. 15.—Oscar Johnson entered a plea of guilty in Justice E. L. Jones' court today to the charge of petit larceny. He stole a bicycle from Andrew Nielson of Provo Bench, which he sold in Salt Lake.

He was sentenced to pay a fine of \$25 and in default of payment will serve twenty-five days in the county jail.

A civil service examination for forest rangers will be held in the federal building here October 21-22. Marriage licenses have been issued to Fern Manwell and Mary E. Flavel, both of Spanish Fork, and to Leo R. Freshwater of Mammoth and Susan Rex of Spanish Fork.

Relatives here have been advised from Greenville, Cal., that John Westfall of this city sustained injuries in a mine accident there last week, consisting of bruises and slight fractures of three ribs. Mr. Westfall is expected to recover in a short time.

## FRENCH CONSTRUCT BIG OBSERVATORY

San Francisco, Sept. 16.—Dr. G. Stefank, noted astronomer and explorer, has arrived here from Paris on his way to Papeete, where the French academy of Science is constructing a large observatory for celestial and aerial observations. Dr. Stefank will spend two months in the Society Islands superintending the construction of the laboratory.

A year was spent by Dr. Stefank in the islands in 1910, observing Halley's comet.

"After the opening of the Panama canal," said Dr. Stefank, today,

## SPAIN AND GIBRALTAR

"Learn One Thing Every Day"

## No. 1. CATHEDRAL OF TOLEDO

Copyright, 1913, by The Mentor Association, Inc.

Rodrigo, last of the Gothic kings of Spain, heard in his palace at Toledo that the Moors had crossed from Africa to Gibraltar. A little army led by Tarik landed in 711 and marched northward, conquering as it went. King Rodrigo, with a great force of Spaniards, met them in Andalusia. He commanded the center. The wings were led by King Witiza's sons, who, hoping to recover the country that Rodrigo had taken from their father, joined the Moors, or gave way before them in battle. Rodrigo was surrounded and cut down. The Moors marched northward, taking city after city in the name of Mohammed, till all Spain was theirs. The last of the Gothic kings had fallen.

From that day this Toledo has never regained her position as the capital of Spain. In the royal palace Tarik found twenty-five crowns of the old Gothic kings, golden and richly jeweled. The Psalms of David written on goldleaf with dissolved rubies, and the emerald table of Solomon. Those crowns may still be seen; but no one has ever seen the other treasures.

The Moorish kings, though they ruled Toledo mildly, had no end of trouble from the haughty nobility, who, robbed of their high position, were always in revolt against the conquerors. At last Sultan Hakim decided to punish his unruly subjects. He gave them a governor of their own race, who pretended to hate the Moors.

"Papeete will become an important port, and the observatory will supply much necessary data to the ships in the Australian and canal trade. I also expect to obtain important results from my study of the constellations of the southern hemisphere. That section of the globe is badly in need of observations and may hold for us some new discoveries."

The equipment for the Papeete observatory will be forty, thirty-eight and thirty centimeter telescopes, besides smaller ones, and a time observatory. The time observatory was recommended by the International Congress of Time at Paris a year ago. The location will be latitude 70 degrees south and longitude 153 degrees west of Greenwich.

The dove it was said by one of the conferees who read Mr. Barrett's letter, hereafter should carry a banana in its beak.

## BANANA REPLACES DOVE OF PEACE

Washington, Sept. 16.—Shooting the dove of peace from off its perch, John Barrett, director-general of the Pan-American union, today installed the banana as the emblem of international tranquility, at least so far as Latin-America is concerned. In a letter addressed to the senate and house conferees on the tariff bill protesting against the proposed duty on the fruit, he portrayed the humble banana as a powerful civilizing influence.

"The building up of the banana

## NOTICE TO CONTRACTORS.

Sealed proposals for building sewers in Sewer District No. 113, being Hudson avenue from 22nd to 24th streets, and Lincoln avenue from 19th to 20th streets, under plans and specifications prepared by the City Engineer and approved by the Board of City Commissioners, will be received at the office of the City Engineer in the City Hall at Ogden, Utah, until 10 o'clock a. m. on the 6th day of October, 1913, at which time all proposals received will be publicly opened and read aloud.

Plans and specifications can be obtained upon application at the office of the City Engineer after September 29, 1913.

The right is reserved to reject any or all bids and to waive any defects. By order of the board of Commissioners.

H. J. CRAVEN, City Engineer.

First publication September 12, 1913. Last publication October 4, 1913.

## NOTICE OF INTENTION.

Notice is hereby given by the Board of Commissioners of Ogden City, Utah, of the intention of said Board to make the following described improvements, to-wit:

To create Ballantyne avenue from 20th to 21st streets for a distance of 750.00 lineal feet, as a sewer district, and to construct therein a pipe sewer together with the necessary manholes, and to connect all with the manholes of the present sewer system, and to defray the whole of the cost thereof, estimated at \$900.00 by a local as-

essment on the lots or pieces of ground lying and being within the following district, being the district to be benefited or affected by said improvement, viz:

All the land lying between the outer boundary lines of said avenue and a line drawn 132 feet outward from and parallel to the said outer boundary lines. Said district to be assessed for the cost of putting in the sewer between 20th and 21st streets on Ballantyne avenue.

All protests and objections to the carrying out of such intention must be presented in writing to the city recorder on or before the 2nd day of October, 1913, at 10 o'clock a. m., that being the time set by said Board of Commissioners when they will hear and consider such objections as may be made thereto, at the mayor's office at the City Hall, Ogden City, Utah.

By order of the board of commissioners of Ogden City, Utah.

Dated this 9th day of September, 1913.

H. J. CRAVEN, City Engineer.

First publication September 9, 1913. Last publication, October 1, 1913.

## NOTICE TO STOCKHOLDERS OF THE OREGON LUMBER COMPANY

Notice is hereby given that a stockholders' meeting of the Oregon Lumber company will be held at the Company's office, No. 154 24th street, Ogden City, Utah, on the 29th day of September, 1913, at 11 o'clock a. m., for the purpose of voting upon the adoption or rejection of the following proposed amendments to the Articles of Incorporation to-wit:

Amend Article IV of the Articles of Incorporation of this Company by striking out the same, and substituting in lieu thereof the following:

Article IV. The objects, pursuit, purpose and nature of the business of this Company to conduct, pursue and carry on the business of owning and operating saw mills, flumes, shingle mills, planing mills and all kinds of wood working machinery; to own, operate, sell and dispose of lumber yards; to buy, sell and manufacture lumber, lath, shingles, sash, doors, boxes, and all other products manufactured from lumber; to own, operate, manufacture, generate, store, transmit, buy, sell and distribute electrical current for heat, light and power; and to erect, buy, sell, lease and otherwise acquire, operate and maintain electric light, heating and power plants; to purchase, own, acquire, encumber, sell and dispose of all kinds of real estate within or without the United States, either for the purpose of securing a supply of timber for the manufacture of lumber, or for the purpose of using such timber lands (when cleared) for other lands for agricultural purposes of all kinds; to appropriate, acquire, own and use water of lakes and running streams for purposes of irrigation and supplying water for household and domestic consumption, watering livestock and for general irrigation purposes; to own, acquire, construct, operate and maintain irrigation systems or other water ways for the generation of electrical and other power, for general sale and distribution, and for the operation of its own mills, lighting, heating and power plants, and for the general distribution of water for sale and rental for irrigation, domestic and livestock purposes and for the purpose of irrigating lands belonging to this Company and other individuals or concerns; and to dispose of any part or parts of such irrigation and power systems and water rights in such manner as the Board of Directors may from time to time determine; to buy, sell, lease, distribute mine; to buy, sell, lease, distribute water rights; to build transmission lines for light, heat, power, telephone or telegraph purposes and to acquire, buy, own and sell franchises and rights-of-way for any of the purposes herein mentioned to own, buy, sell, lease, distribute, or otherwise acquire or dispose of stock in other corporations with the right to exercise such stock ownership in the same manner as private individuals, and to have the right to conduct its business, in any or all of its branches, in any or all of the states of the United States, or without the United States.

Said meeting is to consider and act upon any and all matters which may properly come before it.

D. C. ECCLES, President.

HENRY H. ROLAPP, Secretary.

Ogden, Utah, August 19, 1913.

## NOTICE OF INTENTION.

Notice is hereby given by the Board of Commissioners of Ogden City, Utah, of the intention of said Board to make the following described improvements, to-wit:

To create Hudson avenue, north from 29th street as far as Hudson avenue is now opened through block 10, S. O. S., as a sewer district, and to construct therein a pipe sewer together with the manholes of the present sewer system, and to defray the whole of the cost thereof, estimated at \$700 by a local assessment on the lots or pieces of ground lying and being within the following district, being the district to be benefited or affected by said improvements, viz:

All the land lying between the outer boundary lines of said avenue and a line drawn 132 feet outward from and parallel to the said outer boundary lines. Said district to be assessed for the cost of putting in the sewer between 28th and 29th streets, also for securing the right of way for said sewer, from the north end of said Hudson avenue to 28th street.

All protests and objections to the carrying out of such intention must be presented in writing to the city recorder on or before the 13th day of September, 1913, at 10 o'clock a. m., that being the time set by said Board of Commissioners when they will hear and consider such objections as may be made thereto, at the mayor's office at the City Hall, Ogden City, Utah.

By order of the Board of Commissioners of Ogden City, Utah.

Dated this 26th day of August, 1913.

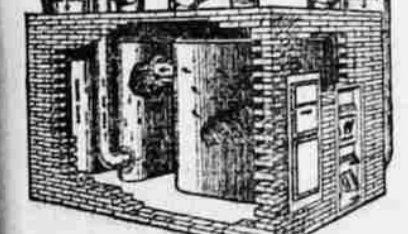

H. J. CRAVEN, City Engineer.

First day of publication August 26, 1913.

Last day of publication September 17, 1913.

# A Quarter Century Old and Good As Ever

THAT'S the record of the Campbell Heater in hundreds of cases. Within the ordinary lifetime a Campbell Heater gives perfect service. It heats your home satisfactorily—which means at any desired degree to suit the weather, cheaply and reliably, with very least time and care. The

## CAMPBELL HEATER

operates by the Rotary Air Movement, acknowledged to be the best system, best

applied of course, in Campbell Heater because A. K. Campbell, himself, invented the Rotary idea. It insures warm floors and you have the good of all fuel.

There is no possibility of leaky radiators or frozen pipes. Gives immediate response to firing, and the heated air is moistened by our large reservoir. You have the humid balmy air of spring. This is a special reason for health, as over-heated air parches the throat and leads to catarrhal troubles.

Letters are received by the score telling of the durability as well as working satisfaction of this solid steel heater. Some we reprint in our booklet "A Warm Story"—Write or phone for it. Address

NEWMAN & STUART 2254 Wash. Tel. 2286
